All Weather Furnishings

OUTDOOR PERFORMANCE
FURNISHINGS CATALOG

Poly-Wood, Inc. is an organization led by entrepreneurs guided by a passion to create and deliver intelligently designed outdoor performance furnishings that fundamentally improve the lives of consumers and encourage stewardship, favorably impacting future generations.

OUR COMPANY

What happens to all the milk jugs that have been recycled throughout the years? In a Northern Indiana garage during the year 1990, high school friends decided to innovatively answer this question. Noting the performance characteristics of recycled plastic and its use in outdoor applications, Doug Rassi and Mark Phillabaum, founders of Poly-Wood, Inc., discovered they could extrude recycled milk jugs into plastic lumber. This revelation led to the idea to design and build outdoor furniture with fundamental performance qualities using plastic lumber.

Today, Poly-Wood is the leader in developing casual outdoor furniture with plastic lumber and occupies over 300,000 square feet of manufacturing space. Our extrusion process is modern and efficient because we utilize 3D design, CNC fabrication and lean manufacturing techniques.

At Poly-Wood, we offer thousands of SKUs and ship a majority of our furniture within three days. Over the years, our customers have rewarded us with increased sales because our products perform well over time and are a fantastic value. We remain committed to using the most effective manufacturing techniques, eliminating waste and delivering what our customers expect. Poly-Wood's commitment to quality allows for many relaxing seasons at the beach, in the yard or on your patio.

OUR LUMBER

POLYWOOD® lumber is made from different proprietary blends of thermoformed plastics, UV-inhibited pigment systems, foaming compounds, and selected process additives. The raw materials are mostly derived from post-consumer bottle waste, such as milk and detergent bottles or other post-industrial material. This material is cleaned by a decontamination process to a high purity level, which removes contaminants such as food residue, paper and adhesives. It is then compounded into a rigid board stock material resulting in an eco-friendly and finished product ideally suited for outdoor furnishings.

Because POLYWOOD lumber is made with a single, purified polymer, it is manufactured to exacting, reproducible specifications. Our proprietary blends have exceptional resistance to corrosive substances such as oil, salt spray and other environmental stresses. Products made with POLYWOOD lumber have excellent weathering resistance; however, as with other polyolefins, it is possible that the material will fade slightly over the service life. Our lumber requires no waterproofing, painting, staining or similar maintenance when used in outdoor applications.

OUR FURNITURE

What does sustainable living mean?

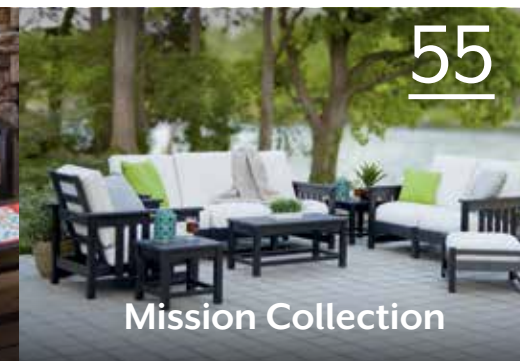

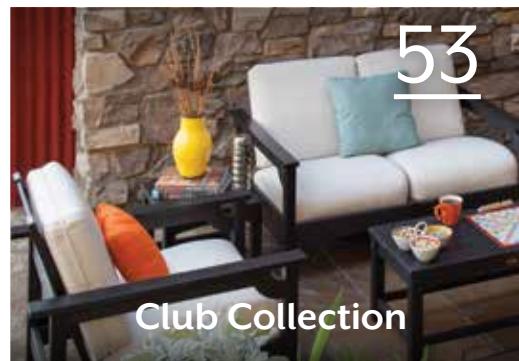

At Poly-Wood, Inc., it means you can purchase a timeless furniture addition and feel good about it. Our furniture contains eco-friendly components and will resist many of nature's elements. Constructed from recycled milk jug lumber and then combined with stainless steel hardware for a high performance product, POLYWOOD furniture is both sustainable and durable. You can be assured your new furniture will become a staple in your outdoor area and last for the next generation to enjoy.

N. Navy

Vibrant Color Extended Care Solutions

Here are some excellent ways to prolong vibrant colors:

1. Keep the furniture covered.

This should be done both in and out of season.

2. Utilize cushions.

Cushions not only add color and comfort, but also prevent direct sunlight from hitting the covered areas. POLYWOOD® offers a wide range of cushions designed to form fit each individual piece. Available for purchase through a POLYWOOD dealer.

3. Minimize direct sunlight by storing the furniture when it's not in use.

This will extend the color fastness of your furniture.

4. Use a UV protector.

Our furniture is all-weather, however, protectants can:

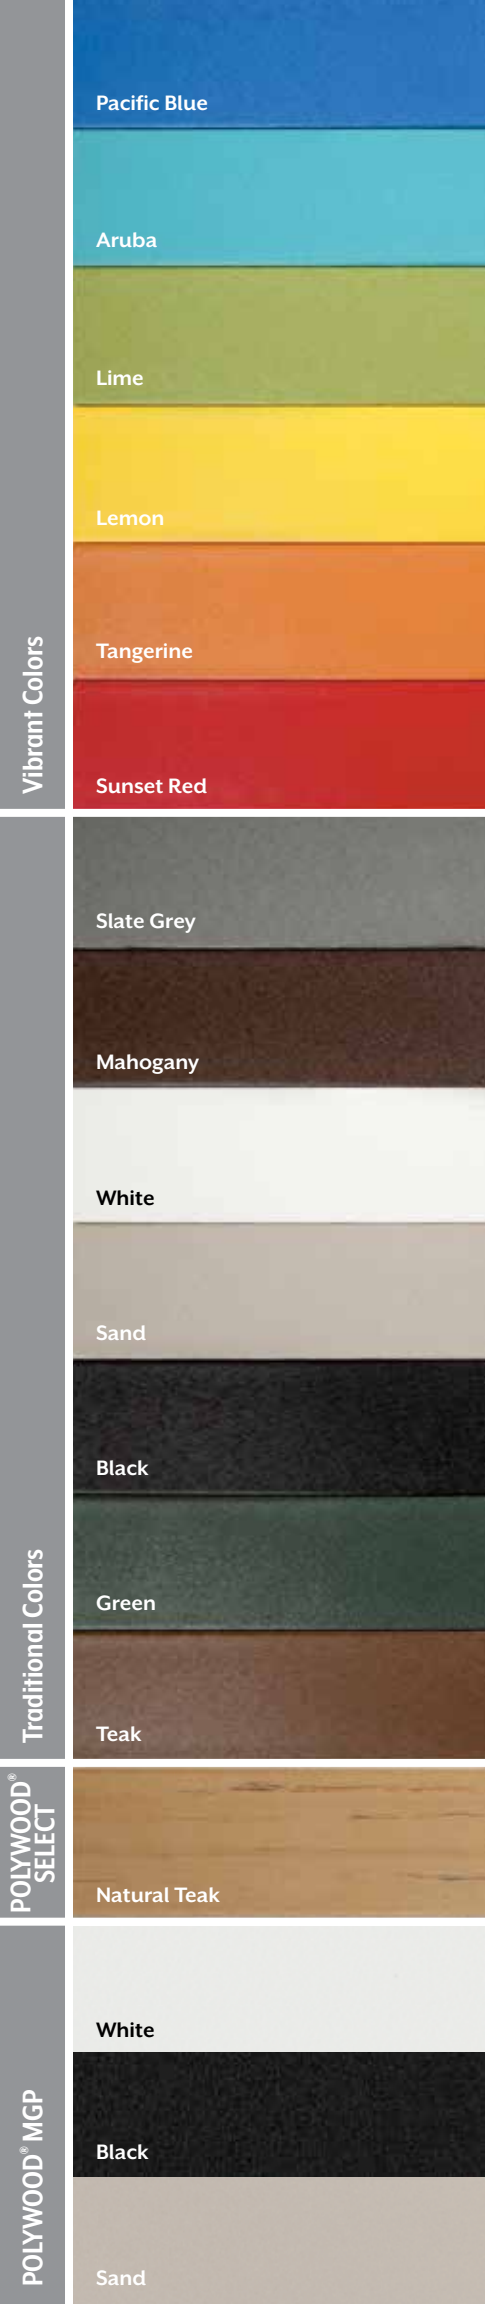

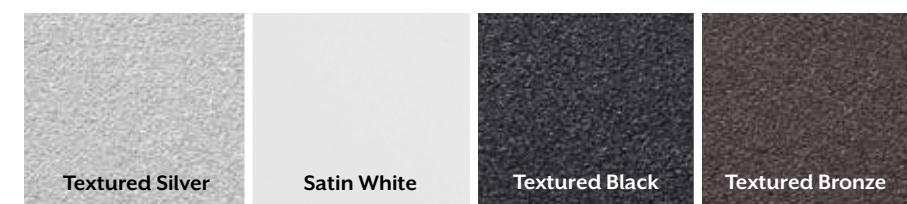

- » prevent fading, discoloration and UV damage
- » renew and revitalize color
- » preserve natural beauty
- » provide a rich, even shine

Note: The same protection on hardware can also help against corrosion in salt air environments.
